

Quarry and Aggregate Industry Make A Rock Solid Connection

Keep your Downtime to a Minimum

Whether you're crushing, screening, or conveying, our Keyless Locking Devices always deliver on this promise:

The key to better machine design is no key at all.

MAV/B-LOC KEYLESS LOCKING DEVICES ARE SUPERIOR TO KEYED BUSHINGS LIKE QD, XT, TAPERLOCK, OR HE BUSHINGS BECAUSE:

- No keyway – Eliminate keyway wallowing and failure due to backlash
- No keyway – Reduced shaft diameter for equivalent transmitted torque
- Superior bending moment capacity
- Zero micromovement eliminates fretting fatigue and corrosion
- Labor savings – No need to machine tapered hubs or tapped holes into the mounting face for assembly
- Superior transmitted torque capacity
- Easier assembly and disassembly

MAV/BLOC Locking Assemblies

Ideal for large pulleys, drums, rotors, and eccentric gearing in high torque applications.

MAV Products not sold in the United States

Quarry and Aggregate Industry Make A Rock Solid Connection

Keep your Downtime to a Minimum

MAV/B-LOC Shrink Discs

Designed to mount hollow shaft gearboxes, hydraulic motors, and gears; also used on rigid flanged couplings.

MAV/B-LOC WK Rigid Shaft Couplings

High performance keyless rigid coupling for hydraulic motors.

B-LOC BCH Compression Hub

Ideal for mounting narrow components to a shaft or mounting components that cannot be subjected to tensile (hoop) stresses.

Key quarry/aggregate equipment manufacturers look to us for the following reasons:

World class engineering support
Customized solutions
